Objective

The primary aim of this project is to apply manual testing techniques to evaluate the functionality, usability, and reliability of the naimi.kz website. The project focuses on identifying defects using Test Scenarios, Test Cases, and Bug Reports while gaining practical testing experience.

PART 1: Selecting Functions & Test Scenarios

Selected Website

naimi.kz — online electronics and home appliances store.

FUNCTION 1: USER REGISTRATION & LOGIN

Goal: To verify that users can successfully register and log in with valid credentials, and that validation messages are shown for invalid inputs.

FUNCTION 2: CREATING AN ORDER / BOOKING SERVICE

Goal: To ensure that users can create a service order, upload attachments, and receive confirmation, with invalid inputs handled properly.

FUNCTION 3: SEARCHING SPECIALISTS / SERVICES

Goal: To verify that users can search and filter specialists effectively and get correct results.

FUNCTION 4: SUPPORT CHAT

Goal: To ensure users can send and receive messages, upload attachments, and maintain session continuity.

FUNCTION 5: LEAVING REVIEWS

Goal: To verify that users can submit, edit, and delete reviews with proper validation.

Part 2: Creating Test Cases:

FUNCTION 1: USER REGISTRATION & LOGIN (TC1–TC10)

TC1 Entering the wrong code during registration

Steps:

1. Go to naimi.kz.
2. Click “Sign In”.
3. Enter a phone number.
4. Enter an *incorrect* OTP code.

Expected Result:

A clear error message like “Incorrect OTP” is displayed.

Actual Result:

User is redirected to a generic error page saying:

“The page you are looking for is unavailable.”

No messaging about incorrect OTP.

TC2 Register with valid details

Steps:

1. Click on “Register” button.
2. Enter Name, Email .
3. Click “Submit/Register”.

Expected Result:

User successfully registered

TC3 Register with existing email

Steps:

1. Click on "Register" button.
2. Enter Name, existing Email .
3. Click "Submit/Register".

Expected Result:

Error: "Email already exists"

Actual Result:

User successfully registered

Почта

Готово

TC4 Register with invalid email

Steps:

1. Click on "Register" button.
2. Enter Name, invalid Email .
3. Click "Submit/Register".

Expected Result :Error: "Invalid email format"

TC9 – Verify session persistence after page refresh (State Transition)

Steps:

1. Log in with valid credentials.
2. Refresh the browser page.

Expected Result: User remains logged in.

TC10 – Logout (EP)

Steps:

1. Login successfully.
2. Click “Logout” button.

Expected Result: User is logged out and redirected to homepage.

FUNCTION 2: CREATING AN ORDER / BOOKING SERVICE

Goal

To ensure that users can create a service order, upload attachments, select date/time, and receive confirmation, with invalid inputs handled properly.

TC1 – Create order with valid details

Steps:

1. Log in to naimi.kz.
2. Select a specialist/service.
3. Click “Create Order”.
4. Enter valid description, date, address.
5. Click “Submit”.

Expected Result: Order is successfully created and confirmation message is displayed.

TC2 – Create order without login

Steps:

1. Open naimi.kz.
2. Select a specialist.
3. Click “Create Order”.

Expected Result: User is redirected to login/registration page.

TC3 – Create order with empty description

Steps:

1. Log in.
2. Open order creation form.
3. Leave description empty.
4. Click “Submit”.

Expected Result: Validation message: “Description is required”.

TC4 – Create order with invalid date (past date)

Steps:

1. Log in.
2. Create order.
3. Select past date.
4. Submit form.

Expected Result: Error message: "Date cannot be in the past".

TC5 – Upload unsupported file type

Steps:

1. Log in.
2. Create order.
3. Upload .exe file as attachment.
4. Submit.

Expected Result: Error message: "Unsupported file format".

TC6 – Upload photo/video

Steps:

1. Log in.
2. Upload photo or video.
3. Submit order.

Expected Result:

photo or video uploaded

Actual Result:

we cant upload video

TC7 – Create order with special characters in description

Steps:

1. Log in.
2. Enter description: @@##\$\$%\$%.
3. Submit order.

Expected Result:

Input is validated or sanitized; order is not broken.

Actual Result:

There is no validation for this section

TC8 – Cancel order creation

Steps:

1. Log in.
2. Start creating order.

3. Click "Cancel".

Expected Result: User returns to previous page; order is not created.

TC9 – Verify order appears in “My Orders”

Steps:

1. Create order successfully.
2. Open “My Orders”.

Expected Result: New order is listed with correct details.

TC10 – Refresh page after order creation (State Transition)

Steps:

1. Submit order.
2. Refresh page.

Expected Result: Order is not duplicated; confirmation persists.

FUNCTION 3: SEARCHING SPECIALISTS / SERVICES

Goal

To verify that users can search, filter, and view correct specialists.

TC1 – Search specialist by valid keyword

Steps:

1. Open naimi.kz.
2. Enter keyword (e.g., “plumber”).
Click search.

Expected Result: Relevant specialists are displayed.

TC2 – Search with no results

Steps:

1. Enter random keyword.
2. Click search.

Expected Result: Message: “No specialists found”.

TC3 – Search with empty input

Steps:

1. Click search without entering keyword.

Expected Result: Validation or default results shown.

TC4 – Filter specialists by category

Steps:

1. Select category filter.
2. Apply filter.

Expected Result: Only specialists from selected category are shown.

TC5 – Filter by location

Steps:

1. Choose city/area.
2. Apply filter.

Expected Result: Results match selected location.

TC6 – Combine multiple filters

Steps:

1. Select category + location.
2. Apply filters.

Expected Result: Results match all applied filters.

TC7 – Clear filters

Steps:

1. Apply filters.
2. Click “Clear”.

Expected Result: All filters reset; default results shown.

TC8 – Sort specialists (rating/price)

Steps:

1. Apply sort option.
2. Observe results.

Expected Result: Results sorted correctly.

TC9 – Open specialist profile from search

Steps:

1. Click specialist card.

Expected Result: Specialist profile opens with correct details.

TC10 – Pagination / load more

Steps:

1. Scroll search results.
2. Load next page.

Expected Result: More specialists are loaded correctly.

FUNCTION 4: SUPPORT CHAT

Goal

To ensure messaging, attachments, and session continuity work correctly.

TC1 – Send text message

Steps:

1. Log in.
2. Open support chat.
3. Send message.

Expected Result: Message is delivered and displayed.

TC2 – Receive response from support

Steps:

1. Send message.
2. Wait for reply.

Expected Result: Support reply appears in chat.

TC3 – Send empty message

Steps:

1. Open chat.
2. Click “Send” with empty input.

Expected Result: Message is not sent; validation shown.

TC4 – Send message with special characters

Steps:

1. Enter @@##\$.
2. Send.

Expected Result: Message is sent correctly or sanitized.

TC5 – Upload attachment in chat

Steps:

1. Upload image/file.
2. Send.

Expected Result: Attachment is uploaded and visible.

TC6 – Upload unsupported file

Steps:

1. Upload .exe file.

Expected Result: Error message displayed.

TC7 – Refresh page during chat (State Transition)

Steps:

1. Send message.
2. Refresh page.

Expected Result: Chat history is preserved.

TC8 – Logout during chat

Steps:

1. Open chat.

2. Logout.

Expected Result: Session ends; chat closed.

TC9 – Long message handling

Steps:

1. Send very long text.

Expected Result:

Message is sent or length validation shown.

Actual Result:

There is no validation and no limit

TC10 – Network interruption

Steps:

1. Disconnect internet.
2. Send message.

Expected Result: Error message about connection failure.

FUNCTION 5: BECOME A SPECIALIST

Goal:

To verify that a user can apply to become a specialist by submitting required personal and professional information, and that the system validates data correctly and completes the application workflow.

TC1 – Open “Become a Specialist” page (EP)

Steps:

1. Open naimi.kz homepage.
2. Click on “Become a Specialist” button/link

Expected Result: "To become a specialist, download the app"

TC2 – Redirect via Google Play button (EP)

Steps:

1. Open naimi.kz.
2. Navigate to “Become a Specialist” section.
3. Click on the “Google Play” button.

Expected Result: User is redirected to the Naimi application page in Google Play.

TC3 – Redirect via App Store button (EP)

Steps:

1. Open naimi.kz.
2. Navigate to “Become a Specialist” section.
3. Click on the “App Store” button.

Expected Result: User is redirected to the Naimi application page in Apple App Store.

Actual Result: User is redirected to the Naimi application page in Google Play.

TC4 – Redirect via Huawei AppGallery button (EP)

Steps:

1. Open naimi.kz.
2. Navigate to “Become a Specialist” section.
3. Click on the “Huawei AppGallery” button.

Expected Result: User is redirected to the Naimi application page in Huawei AppGallery.

Actual Result: User is redirected to the Naimi application page in Google Play.

TC5 – Select service category and specialization (EP)

Steps:

1. Open application page.
2. Select a service category (e.g., Cleaning).
3. Select specialization if available.

Expected Result: Selected category and specialization are saved correctly.

TC6 – Submit application with empty required fields (EP)

Steps:

1. Open “Become a Specialist” page.
2. Leave required fields empty.
3. Click “Submit”.

Expected Result: the button won't press “Submit”.

TC7 – Open job vacancy and view details (EP)

Steps:

1. Open naimi.kz.
2. Navigate to “Jobs / Vacancies” section.
3. Click on any job listing.

Expected Result: Full job details (description, requirements, conditions) are displayed.

Actual Result: “Get a Job” button

TC8 – Open profile form page (EP)

Steps:

1. Log in to Niami.
2. Navigate to “My form”.
3. Click “Edit Profile” or “Fill Profile”.

Expected Result: Profile form opens successfully.

TC9 – Edit and save profile (State Transition)

Steps:

1. Open profile form.
2. Change name, phone, or skills.
3. Click “Save”.
4. Refresh the page.

Expected Result: Changes are saved and displayed correctly.

TC10 – Verify application status after submission (State Transition)

Steps:

1. Submit valid specialist application.
2. Navigate to profile or application status section.

Expected Result: Application status is displayed as “Pending”.

PART 3: Bug Report

Bug 1

Bug ID: NAIMI-01

Summary/Overview: Incorrect OTP during registration leads to generic error page instead of proper message.

Steps to Reproduce:

1. Go to naimi.kz.
2. Click "Sign In".
3. Enter a phone number.
4. Enter an incorrect OTP code.

Expected Result: A clear error message like "Incorrect OTP" is displayed.

Actual Result: User is redirected to a generic error page: "The page you are looking for is unavailable." No messaging about incorrect OTP.

Environment Details: macOS and Safari

Priority: High

Severity: Major

Attachments:

Status: Open

Bug 2

Bug ID: NAIMI-02

Summary/Overview: Registration allows duplicate emails; existing email can be registered again.

Steps to Reproduce:

1. Open naimi.kz.

2. Click on "Register" button.
3. Enter Name.
4. Enter an **email that is already registered**.
5. Click "Submit/Register".

Expected Result: Error message: "Email already exists" is displayed, and registration is blocked.

Actual Result: User is successfully registered, creating a duplicate account with the same email.

Environment Details: macOS and Safari

Priority: High

Severity: Major

Attachments:

The screenshot shows a registration form with a light blue header. The first section is labeled "Почта" (Email) and contains a text input field with the email address "230103126@sdu.edu.kz". To the right of the input field is a small icon of a person with a checkmark. Below the input field is a blue button labeled "Готово" (Ready). Below the button is a green rounded rectangle containing a green checkmark icon and the text "Вы успешно зарегистрировались" (You have successfully registered).

Status: Open

Bug 3

Bug ID: NAIMI-03

Summary/Overview:

Login / Registration allows submission with blank email.

Steps to Reproduce:

1. Click on "Register" button.
2. Enter Name.
3. Leave Email field blank.
4. Click "Submit/Register".

Expected Result: Error message: “Email required” is displayed and registration is blocked.

Actual Result: User is successfully registered even with blank email.

Environment Details: macOS and Safari

Bug 4

Bug ID: NAIMI-04

Summary/Overview: Upload photo/video fails

Steps:

1. Log in
2. Upload photo/video →
3. Submit order

Expected Result: File uploaded successfully

Actual Result: Cannot upload video

Environment Details: macOS and Safari

Priority: Medium

Severity: Major

Attachments:

Status: open

Bug 5

Bug ID: NAIMI-05

Summary/Overview: Order description field does not validate or sanitize special characters.

Steps to Reproduce:

1. Log in to naimi.kz.
2. Create a new order.
3. Enter special characters in the description field, e.g., @@##\$%\$%.
4. Submit the order.

Expected Result: Input is validated or sanitized; order should not accept invalid special characters that could break the system.

Actual Result: There is no validation; order is submitted successfully with special characters.

Environment Details: macOS and Safari

Priority: Medium

Severity: Major

Attachments:

Status: Open

Bug 6

Bug ID: NAIMI-06

Summary/Overview: Chat/message field does not validate or limit long messages.

Steps to Reproduce:

1. Open naimi.kz.

2. Navigate to chat or message section.
3. Enter a very long text message.
4. Click “Send”.

Expected Result: Message is either sent correctly or length validation is shown to prevent excessively long input.

Actual Result: There is no validation and no limit; message field accepts extremely long text.

Environment Details: macOS and Safari

Priority: Medium

Severity: Major

Attachments:

Status: Open

Bug 7

Bug ID: NAIMI-07

Summary/Overview: App Store and Huawei AppGallery buttons redirect incorrectly.

Steps to Reproduce:

1. Open naimi.kz.
2. Navigate to “Become a Specialist” section.
3. Click the “App Store” button → redirected to Google Play.
4. Click the “Huawei AppGallery” button → redirected to Google Play.

Expected Result: App Store button to Apple App Store. Huawei AppGallery button to Huawei AppGallery

Actual Result: Both buttons redirect to Google Play.

Environment Details: macOS and Safari

Priority: High

Severity: Major

Attachments:

Status: Open

Bug 8

Bug ID: NAIMI-08

Summary/Overview: Clicking on a job vacancy shows only the “Get a Job” button instead of full job details.

Steps to Reproduce:

1. Open naimi.kz.
2. Navigate to “Jobs / Vacancies” section.
3. Click on any job listing.

Expected Result: Full job details (description, requirements, conditions) are displayed.

Actual Result: Only the “Get a Job” button is displayed; full details are missing.

Environment Details: OS Safari

Priority: Medium

Severity: Major

Attachments:

Status: Open
